PROFESSIONAL SUMMARY

Aspiring Cybersecurity & Cloud Security Engineer and Computer Science (B.Tech) student with hands-on expertise in cloud infrastructure hardening (AWS), web application security (OWASP Top 10), network reconnaissance (Nmap), and full-stack development. Proficient in engineering AI-assisted threat detection systems, executing IAM least-privilege policy audits, and developing hardened web architectures.

TECHNICAL SKILLS

Cybersecurity & Web Security: Network Security, OWASP Top 10, IAM, Nmap, Burp Suite, Wireshark, Threat Modeling, Vulnerability Assessment, AI Security

Cloud & Infrastructure: AWS (S3, IAM, KMS, CloudTrail), Linux (Kali, Debian/Ubuntu), Git, Docker, CI/CD Security

Languages & Developer Tools: Python, JavaScript, TypeScript, React, Node.js, Express, MongoDB, FastAPI, TensorFlow, HTML/CSS

PROJECTS

BankGuard Nexus | AI Banking Fraud Detection & Security System

- Engineered a centralized security decision engine parsing SMS payloads, evaluating malicious URLs, and detecting OTP phishing scams with 97% accuracy under 350ms using local ML classification models. *(Python, FastAPI, TensorFlow, React, OWASP)*

CloudShield | Secure AWS Cloud Storage Architecture

- Architected a secure cloud file storage pattern on AWS utilizing S3 bucket policies to block public access, customer-managed KMS key rotations, and IAM role isolation with short-lived pre-signed URLs. *(AWS S3, IAM, KMS, CloudTrail, Node.js, Express)*

Sentinel AI | AI Security & Threat Log Scanner

- Developed an AI-assisted log analyzer parsing system access trails, locating 95% of lateral movement threat anomalies and generating prioritized remediation recommendations. *(Python, FastAPI, React, Machine Learning)*

Secure Task Manager | Hardened Web Application

- Built a multi-user task platform enforcing defensive web controls including JWT authorization, bcrypt password hashing, input parameter sanitization, and rate-limiting against OWASP Top 10 vulnerabilities. *(React, Node.js, Express, MongoDB, JWT, BCrypt)*

EXPERIENCE / INTERNSHIPS

Web Development Intern — Cognifyz Technologies (Nov 2025 – Dec 2025)

- Developed responsive web applications using HTML, CSS, JavaScript, and React; optimized frontend state rendering and ensured cross-browser compatibility.

Full Stack Developer Intern — Dexmiq Solutions (Sep 2025 – Oct 2025)

- Built full-stack web features using Node.js, Express, and MongoDB; implemented REST API routes, parameter validation, and secure authentication workflows.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Siddhartha Institute of Technology & Sciences, Hyderabad | Expected Graduation: 2026

CERTIFICATIONS

- Cisco Networking Essentials** — Cisco Networking Academy
- TryHackMe Web Fundamentals** — TryHackMe
- AWS Machine Learning Foundations** — AWS Training & Certification

ACHIEVEMENTS & RECOGNITION

- Active participant in competitive cybersecurity hackathons and web development technical challenges.
- Built and published open-source security auditing scripts and cloud security architectures on GitHub.
